

# ACRONIS® ACCESS ADVANCED

Acronis Access Advanced is an easy, complete and safe sync and share solution, effectively balancing employees need to use any and all their devices to be productive, with the organizations need for data security, privacy, visibility, compliance and BYOD support. Employees use any device to safely access corporate files and securely share documents with other employees, customers, partners, and vendors. Designed exclusively for business, Acronis Access Advanced transforms mobile devices, including BYOD, into a natural extension of your business.

## BENEFITS OF ACRONIS ACCESS ADVANCED

- **Enables users to easily access, create, and edit business files anytime, anywhere**
- **Control your mobile world** – Sophisticated security controls managed by the Acronis Policy Engine give IT all the tools they need to protect the company's critical data assets.
- **Drive competitive advantage** – Advanced use of mobile devices drives faster, more informed decision-making and ultimately improves revenue, profitability, and customer satisfaction.
- **Enable BYOD** – Employees can use their preferred devices while still giving IT complete control around content access and sharing.

## SECURE ACCESS, SYNC, AND SHARE SOLUTION

**Content, Anywhere, Anytime** – Acronis Access Advanced lets authorized employees access, sync, and share content that resides on corporate file servers, SharePoint, NAS and CMIS repositories like Alfresco and EMC Documentum using any device – iPhone, Windows or Android smart phone, tablet, laptop, PC or Mac.

**Redesigned user experience on iOS mobile devices** – delivers completely redesigned and optimized user experience to put all the power and control at the end user's fingertips.

**More collaboration power and control** – Users have more flexibility and control on shared materials. IT can define policies on file types, size and properties.

**Secure In-app Editing and Annotation** – Users can create and edit Office documents and annotate pdf's within the Acronis Access Advanced mobile app, turning the mobile device in a true business platform.

**Safe Web Preview** - Users have safer and faster view of sensitive or important files using their sanctioned Web Browsers, without having to download the document first. A must have for companies with stringent security and compliance policies.

**Advanced Security and Control** – The Acronis Access Advanced policy engine provides granular management capabilities to create security policies and ensures control and compliance for content, users and devices.

**Integration with Active Directory®** - Integrates with Active Directory® for authentication, user account management, and device enrollment.

**Tracking and Audit Trails** – Acronis Access Advanced provides an enterprise-class audit trail and history for all transactions, including search, filter and export functions, giving IT the visibility to see what users are doing, what documents they access, and with whom they share documents.

**Encryption** – Acronis Access Advanced provides secure over-the-air and on-device FIPS 140-2 certified encryption.

**Easy-to-use User Interfaces** – Intuitive and modern user experience make it simple and natural for users to use, requiring virtually no training.
